*Annual Experience of Care
and Health Outcomes
(ECHOTM) Survey Report‡*

Prepared for
Northeast
Behavioral
Health Care
Consortium

Introduction

Pennsylvania's Department of Public Welfare (DPW) prescribes that Northeast Behavioral HealthCare Consortium (NBHCC) conduct annual satisfaction surveys of consumers, persons in recovery, and families of children and adolescents receiving services from NBHCC under the HealthChoices Program.

The purpose of the Member Satisfaction Survey is to determine the extent to which NBHCC adult Members and family members of children and adolescents are satisfied with overall NBHCC operations and services and to identify areas which need improvement. The surveys used by the Advocacy Alliance to gather information to determine whether NBHCC Members and family members are knowledgeable about and satisfied with the behavioral health program, including core functions such as Member services, as well as to assess whether service availability, service access, and services provision and effectiveness are meeting the Member's and family members' needs and expectations.

Survey Methodology

The Experience of Care and Health Outcomes (ECHO™) survey tool, which is part of the Consumer Assessment of Healthcare Providers and Systems (CAHPS) family of surveys and developed with support from the Agency for Healthcare Research and Quality (AHRQ), was used to evaluate behavioral healthcare under NBHCC from the adult Member's perspective and from the perspective of the family members of children and adolescents. Without changing question substance, NBHCC and the Advocacy Alliance merged the adult and child versions of the ECHO™ survey, creating one universal survey tool. If a question was specific to one population, a response choice of Not Applicable was added to the question response set.

The Advocacy Alliance worked with NBHCC to develop a sampling protocol determined by the population identified within the scope of the study. Upon reviewing the ECHO™ Survey instructions, it was determined that the sampling protocol (called Sample A) most highly recommended by the ECHO™ development team would be most appropriate for use. The sampling protocol used was that of drawing the sample from the population of Members known to have received/used the Behavioral Health Services and who met the following criteria:

- o The individual was 18 years old or older (as of January 1 of the current year) or, if a child or adolescent under age 18, parent/guardian contact information provided;
- o The individual was enrolled in the organization when the sample was drawn;
- o The individual should be enrolled in HealthChoices for the previous 12 months; and
- o The individual received ambulatory or outpatient and day/night behavioral health care services during the evaluation period (with behavioral health services defined to include mental health and chemical dependency services).

The sampling instructions also stated that there should be no other members of the household in the sample frame. While attempts were made to follow this instruction, due to many members sharing addresses (i.e., Children and Youth, Child/Adolescent Residential Treatment Facilities, Personal Care Boarding Homes, Community Residential Rehabilitation) this was not possible.

During 2007-2008, NBHCC and the Advocacy Alliance modified the sampling process to ensure that each large provider agency was well represented in the random sample. This was done by taking a percentage of the full sample from each provider, as outlined in the following table.

Provider Agency	Total Number of Members Surveyed	% of Total Random Sample
Children's Service Center of Wyoming	672	12%
Children's Behavioral Health	227	4%
Community Counseling Services of NEPA	672	12%
First Hospital	560	10%
Northeast Counseling Services	672	12%
Scranton Counseling Services	672	12%
Northwestern Human Services	672	12%
Remaining Members	1,019	18%
Members who filed a Complaint or Grievance	434	8%
Total	5,600	100%

From the database provided by NBHCC, the Alliance used random sampling software to draw a random sample of Members as outlined above, which included a representative sample of adult, child and adolescent Members stratified to include those Members who have a serious mental illness and Members who are other priority services users. Included in the stratified sample are all Members who have filed a complaint and/or grievance.

In total, NBHCC provided the Alliance with a database of 30,534 Members and, upon completion of the sampling process, the Alliance distributed 5,600 Member Surveys (see Detailed Member Sample table below).

Service Provider	Population	Under 18 Members Served (N)	Number of Total Surveyed	18 & Older Members Served (N)	Number of Total Surveyed	Number of Total Members Surveyed

	Total	3,941	367	7,015	652	1,019
Members who filed a Complaint or Grievance		374	374	60	60	434
Grand Total		11,819	2,455	19,149	3,145	5,600

	Total Surveys Distributed (N)	% of Total Surveys Distributed
Under 18	2,081	37%
18 & Older	3,085	55%
Members who filed a complaint or grievance	434	8%
Total Surveys Distributed	5,600	100%

The Member Surveys were distributed through a “waved” mail out process outlined by the ECHO™ survey designers and designed to best meet the response goal of a minimum of 200 responses for each survey question. The process outlined included:

- (1) Send questionnaire and cover letter.
- (2) Send a reminder postcard to non-respondents two weeks after mailing the first questionnaire.
- (3) Send replacement questionnaire with a second letter to non-respondents three weeks after mailing the first questionnaire.
- (4) Send a reminder postcard to non-respondents two weeks after mailing the second questionnaire.
- (5) Send replacement questionnaire with a third letter to non-respondents three weeks after mailing the second questionnaire.
- (6) Send a reminder postcard to non-respondents two weeks after mailing the third questionnaire.

The Alliance modified the suggested survey timeframe to accommodate for holidays and weekends during the mail out process and added an option for Members to complete the survey via a secured website, with User IDs and Passcodes included in the cover letter sent with the Member Survey. Ten (<1%) Members completed the survey using the website.

Survey Completion Rate

The optimal goal of receiving a minimum of 600 completed Member Surveys was exceeded. The Alliance received 798 unduplicated surveys, representing a 14% response rate (increasing from a 13% response rate during 2012-2013, decreasing from a 15% response rate during 2011-2012, remaining the same at a 14% response rate during 2010-2011, 2009-2010 and 2008-2009, increasing from a 13% response rate during 2007-2008 and decreasing from a 17% response rate during 2006-2007). Among the sample of 798 survey completers, 59 said they had not received services or did not respond to the question regarding receiving services and were eliminated from further data analysis (all of these individuals had been identified in the original database as service recipients). The following data reflects the responses of 739 unduplicated surveys, which includes a small number of surveys (28) completed by a proxy (someone other than the Member).

Respondent Profile

The following data reflects only those survey completers that reported receiving services, with the data from those Members who received a survey as a result of filing a complaint/grievance included in the total number of responses. Please note that, while some Child/Adolescent Members report their current age of 18, their age at the time the sample was drawn was under 18.

Data Display

Data from the survey is presented as counts (e.g., 44 responses) and as percentages (e.g., 10%). Additionally, data from the survey is presented as percentages “rounded” to the nearest whole number. This rounding standard means that any percentage that was 0.1-0.4 above a number (e.g., 33.1%) would be rounded down to the nearest whole number (i.e., 33%). Any percentage that was 0.5-0.9 (e.g., 22.9%) would be rounded up to the nearest whole number (i.e., 23%). In this report, it is possible to see percentages accounting for slightly more or less than 100% (i.e., 99% or 101%) due solely to rounding.

Composite Measures

The following data shows the composite measures as outlined by the ECHO™ Survey Reporting Measures. Overall data of those Members reporting to have used behavioral health services are shown in the following tables and graphs.
